DP to HDMI cable adapter (15CM)

DPA02-D2HM-15

This is a kind of DP to HDMI adapter with 15CM cable. This adapter has the ability to deliver high-definition digital audio and video to the display in packet data format – allowing selective screen area updates and provides power saving features required for notebook applications. With one single cable for AV applications thus reduces cost on both the PC side as well as the display side. With the ease of the plug-and-play feature, it is user-friendly for the consumer.

Specifications:

DisplayPort v1.1 Compliant

HDMI V1.3b Compliant

Enable high quality optional digital audio transmissions

Supports a full 1080P resolution 24-bit color depths
