

VGA UTP Extender 1X4 Splitter with Audio

VGAS02-14SL

The VGAS02-14SL VGA UTP Extender 1X4 Splitter with Audio is a device that combines extender and splitter functions which is ideal for local display and remote viewing. The input VGA and audio signals are sent to four identical outputs at the same time by ordinary, inexpensive Cat5e/6 cable wherein the four receivers can each work as a set with the sender, and transmitted to the VGA display up to a maximum of 300M.

This device includes the following qualities:

- ◆ Supports up to 1920 x 1200 video resolution
- ◆ Supports dual outputs, one for VGA output at local site and four UTP outputs at remote sites.
- ◆ Supports VGA video and stereo audio signals up to a maximum of 300M with one UTP Cat5e/6 cable.
- ◆ Supports HDTV, flat panels, and monitor projectors
- ◆ Supports Gain (brightness) and Peak (skew) adjustments for different UTP cable length.
