

VGA with R/L Audio to HDMI Converter

HDC02-V2H

The VGA with R/L Audio to HDMI Converter changes VGA input into HDMI output display, wherein personal computer users can show larger image display like on TV instead of just computer monitors. This device also includes right and left audio for full audio/video experience.

FEATURES

Supports HDCP pass-through

Converts VGA video with right and left audio from computer to HDMI

Easy installation and no need for setting

Under different conditions, images can be adjusted manually.
