

## HDMI Matrix 4x2

HDM02-42

The HDMI Matrix is a device that directs high resolution 1080p and digital audio from any four HDMI sources to two output displays. The HDMI switcher removes the necessity to disconnect and reconnect from sources which has only one output. This device has a full high resolution HDTV signal up to 1080p and works with HD-DVD players, Blue Ray DVD, PS3, and a satellite set-up box that connects with HDMI display. It also has infrared remote control for easy access any time.

### FEATURES

Supports up to 1080p video resolution

Supports HDCP 1.1

Supports HDMI 1.3b

Supports easy switching between any four HDMI input sources to any or combination two High quality output displays.

HDMI display can view from any source

Infrared remote control included for easy switching
