

HDMI Matrix 4x2 Audio+Toslink/Coaxial Output

HDM02-42A

The HDMI Matrix 4x2 Audio+Toslink/Coaxial Output is a device that directs high resolution 1080p video and digital audio from any four HDMI sources to two output displays as well as present higher quality audio through signal transmission to the amplifier by stereo, toslink, or coaxial cable. This devices removes the necessity to disconnect and reconnect from sources which has only one output. This device has a full high resolution HDTV signal up to 1080p and works with Blue Ray DVD, PS3, HD-DVD players, and a satellite set-up box that connects with HDMI display. It also has infrared remote control for easy access any time.
