

USB to DVI Converter

UB202-U2DV

The USB DVI Converter lets user add another display output using USB2.0 port of the computer without having to install another video card. It is easy to use and no need to use the function key to change monitor. It will detect the add-on monitor, LCD, or projector. The adapter uses very little power so it has practically no effect on computer performance. And when not in use, just unplug the extra monitor.

FEATURES

- Add another monitor or other video display output through the computer USB2.0 port
- Supports DVI video display or DVI-I to VGA Adapter
- Supports plug & play
- Supports up to 1600x1200 video resolution
- No need to reboot when adding or removing display output
